

Proposal to Deploy **Venlearn** School Management Software

One Software. Complete School Management.
Better Education. Stronger Schools.

Executive Recommendation

Recommendation

Adopt the full Venlearn Complete feature set as the school's central operating system so administration, academics, finance, CBT, parent engagement, welfare, transport, hostel, inventory, communication, and campus operations are connected from the outset.

Venlearn brings the everyday work of a school into one connected workspace. Instead of keeping student data in registers, fees in separate ledgers, report cards in spreadsheets, announcements in messaging apps, and exam records in isolated tools, the school can maintain one reliable source of truth across administrators, teachers, bursars, parents, students, and leadership.

For school administrators, the value is not only that Venlearn has many features. The value is that the features are connected: a student record links to guardians, fees, attendance, results, timetable, hostel, transport, incidents, learning resources, and communication history. This makes decisions faster, reduces avoidable errors, improves parent confidence, and gives leadership clearer visibility into what is happening each term.

Why Schools Need Venlearn

- Administrators spend too much time reconciling paper registers, Excel sheets, fee books, lesson notes, printed report cards, and scattered files.
- Parents expect timely updates on attendance, fees, events, results, assignments, and school notices.
- School leaders need reliable reports on student population, fee collection, staff activity, academic performance, attendance, assets, safety, and operations.
- Teachers need simple workflows for attendance, lesson planning, score entry, learning resources, and class communication.
- Schools with unstable internet still need software that can work offline for core operations and CBT.
- Schools whose current software providers are inadequate need a stronger upgrade with broader features, better usability, reliable support, and room for future growth.

- Schools that want to adopt computer-based testing but have not figured out the right process need a ready CBT system that supports offline LAN exams, online tests, question imports, monitoring, marking, and result publishing.

Venlearn directly addresses these issues by combining cloud, offline/local deployment, role-based access, online and offline CBT, parent and student portals, fee management, report cards, communication, and operational modules in one platform.

The Venlearn Advantage

Area	What Venlearn Provides	Benefit to the School
One source of truth	Student, staff, guardian, finance, academic, attendance and operations records in one workspace.	Less duplication, fewer mistakes, faster reporting, and better institutional memory.
Role-aware access	Admins, staff, parents and students see the records and actions meant for them.	Sensitive data stays protected while each user gets a simpler experience.
Offline and cloud options	Venlearn can run online, offline over a local area network, or with sync where required.	Useful for schools with inconsistent internet, exam labs, or campuses that need local control.
CBT built for schools	Question banks, Word imports, offline LAN tests, online tests, monitoring, timing, marking and result publishing.	Schools can run assessments without depending only on Google Forms or constant internet access.
Better user interface and smooth user experience	A modern, role-aware workspace designed to make daily school tasks easier for administrators, staff, parents and students.	Users adopt the system faster because the software feels clearer, cleaner and easier to navigate.
Parent confidence	Parents can access fees, receipts, attendance, results, announcements, assignments, calendars and messages.	Fewer repetitive calls to the office and a more transparent school-family relationship.

Area	What Venlearn Provides	Benefit to the School
Operational breadth	Hostel, transport, medicals, incidents, inventory, facilities, events, library and activities.	The software supports the wider life of the school, not only exams and fees.
Available customer support	Guidance is available for setup, migration, training, troubleshooting, workflow questions and day-to-day account support.	The school is not left alone after purchase, which reduces adoption risk and staff frustration.

Complete Feature Inventory

The following modules are included in the recommended full Venlearn adoption. Implementing all core features gives the school one connected operating system instead of separate tools for records, fees, academics, exams, communication, welfare, and operations.

Feature Inventory: Records, Access and Daily Administration

Module	What the module covers
Students Management	Complete student biodata, class placement, admission status, documents, academic history, guardians, transfers, withdrawals, alumni records, promotions, emergency contacts, notes, tags, houses, clubs, and reports.
Staff Management	Teacher and non-academic staff profiles, departments, subject and class assignments, employment records, contact details, attendance, workload, activity history, permission groups, directories, and exports.
Guardians Management	Parent and guardian profiles linked to one or many students, relationship types, contact channels, pickup permissions, emergency contacts, portal access, communication history, household records, and family reporting.
Parents & Students Portal	Secure family and learner access to results, report cards, invoices, receipts, attendance, assignments, learning resources, calendars, timetables, teacher updates, messages, and role-aware records.
Fee Collection	Fee schedules, invoices, receipts, balances, discounts, payment plans, arrears, payment recording for cash, bank transfer, POS and online payments, reminders, debtor lists, and finance summaries.
Attendance	Daily, class, subject, hostel and staff attendance registers, late/absent/excused/custom statuses, parent notifications, term summaries, date-range reports, and exception patterns for leadership review.

Feature Inventory: Academics, Assessment and Learning

Module	What the module covers
Results & Report Cards	Assessment scores, exam marks, grading scales, report card templates, online result checking, report card printing, score imports from CBT, Excel and other sources, class averages, teacher and principal remarks, approval workflows, class positions, downloadable reports, portal publishing, psychomotor notes, attendance summaries, and result analytics.
CBT: Offline & Online	Question banks for objective, theory, fill-in-the-blank, image and audio questions, Microsoft Word imports, offline LAN exams, online tests, timing, randomized questions, shuffled options, exam windows, monitoring, switch alerts, automatic marking, manual review, result publishing, and analysis reports.
Digital Learning & eLibrary	Notes, books, videos, assignments, past questions, study resources, class and subject organization, portal access, visibility controls, and engagement signals for popular or recently uploaded materials.
Lesson Planner	Lesson objectives, topics, activities, materials, assessments, subject/class/teacher/week/term organization, department review, approvals, reusable templates, resource attachments, and progress tracking.
Timetable	Class, teacher, room, subject and period scheduling, conflict checks, student and staff views, substitutions, announcements, and reusable termly schedule structures.
Library Management	Book cataloging, authors, categories, shelves, copies, ISBNs, availability, borrowing, renewals, reservations, overdue returns, fines, borrower histories, reminders, and inventory reports.

Feature Inventory: Communication, Welfare and Campus Operations

Module	What the module covers
Messaging and Communication	Announcements, reminders, targeted notices for classes, departments, hostels, routes, clubs, individuals or the whole school, message history, emergency alerts, delivery records, and reusable templates.
Event Calendar	Academic calendars for terms, holidays, exams, open days, meetings, activities, recurring events, category visibility, reminders, and shared web and portal views.
Medicals and Incidents Reporting	Medical profiles, allergies, conditions, medications, clinic notes, incident records, guardian notifications, follow-up actions, staff responsibility tracking, confidential access controls, and wellbeing reports.
Hostel Management	Hostel, dormitory, room, bed and resident allocation, boarding status, capacity tracking, hostel attendance, leave requests, incidents, welfare notes, emergency records, occupancy, availability and movement reports.
School Bus Routes Management	Routes, buses, stops, drivers, attendants, student manifests, pickup and drop-off details, transport assignments, delay notices, route changes, parent communication, ridership, capacity and billing-support reports.
Inventory and Facility Management	Supplies, equipment, assets, classrooms, stock levels, issue logs, returns, purchases, reorder visibility, maintenance requests, repairs, facility usage, accountability reports, and operational planning records.
Extracurricular Activities	Clubs, societies, sports, houses, activity groups, participant lists, coordinators, schedules, events, attendance, achievements, awards, competitions, communication, and engagement reports.

Benefits by Stakeholder

For School Owners, Directors and Principals

- Clearer visibility into enrolment, attendance, fee collection, academic performance, staff work, student welfare, and operational activities.
- Better accountability because workflows, approvals, communication, records, and reports are tied to users and dates.
- A more modern school image during admissions, parent engagement, assessments, and reporting.

For Administrators and Bursars

- Faster record lookup, fee balance checks, receipt handling, arrears follow-up, timetable updates, and report preparation.
- Reduced dependence on paper files and manual spreadsheet reconciliation.

For Teachers

- Simpler access to class lists, attendance, lesson plans, score entry, learning resources, timetables, messages, and assessments.
- Less repetitive formatting work when results and report cards are generated through a structured workflow.

For Parents and Guardians

- Secure visibility into their wards' fees, receipts, attendance, results, events, assignments, learning materials, and notices.
- More timely reminders and fewer missed updates about fees, events, attendance concerns, incidents, or school activities.

For Students

- Access to timetables, assignments, eLibrary materials, CBT activities, results, announcements, and learning resources.

Cost Advantage and Income Improvement

Venlearn is not only an administrative expense. Used properly, it helps the school reduce avoidable costs, protect revenue, improve collections, and create a more attractive experience for parents who are deciding where to enrol their children.

Opportunity	How Venlearn Creates Financial Value
Transparent fee payment	Invoices, receipts, balances, arrears and reminders make fee payment easier to track, reduce confusion, and help the school detect leakages or unrecorded payments.
Timely collections	Automated fee reminders and parent portal visibility encourage earlier payment, reduce follow-up workload, and minimize losses from forgotten or disputed balances.
Time saved by teachers	CBT marking, score imports, report card generation and structured result workflows reduce time spent marking scripts, entering scores and formatting reports, turning staff hours into direct value for the school.
Higher parent trust	Parents feel relief when they can see their wards' attendance, results, assignments, fees, announcements and school activities, which improves satisfaction and supports retention.
Improved enrolment	Online school operations, portals, enquiries, admissions workflows and remote access make it easier for families anywhere in the world to begin or complete enrolment conversations.

Cost Advantage and Income Improvement (Continued)

Opportunity	How Venlearn Creates Financial Value
Lower operational overhead	One dashboard for records, fees, academics, transport, hostel, inventory, welfare and communication reduces the need to hire separate dedicated heads or clerks to manually manage disconnected operations.
Transport cost visibility	School bus route records, student manifests, route changes and transport reports improve transparency around routing, capacity planning, billing support and fuel-cost estimation.
Reduced printing and paper costs	Digital records, online results, downloadable report cards, messages, eLibrary materials and portal access reduce repeated printing, photocopying, physical file storage and manual distribution.
Better asset accountability	Inventory and facility records help the school track equipment, supplies, repairs, stock levels and usage, reducing waste and unexplained losses.
Faster leadership decisions	Dashboards and reports give school leaders a clearer view of enrolment, finance, attendance, academic performance and operations before problems become expensive.

Recommended Packaging and Pricing

Plan	Included modules	Price
Essentials	Students, staff, guardians, attendance, timetable, event calendar, messaging and parent/student portal.	NGN 2,000 per student per term.
Growth	Everything in Essentials plus fee collection, results/report cards, lesson planner, eLibrary, library, bus routes, medicals and incidents.	NGN 3,000 per student per term.
Complete	Everything in Growth plus CBT offline/online, hostel, inventory/facility management, extracurricular activities, offline/local deployment option and workflow setup support.	NGN 4,000 per student per term.

Recommended option: Complete. This gives the school the full Venlearn operating system from the start, including administration, finance, academics, CBT, portals, hostel, inventory, welfare, activities, offline/local deployment options and deeper rollout support.

Implementation and Onboarding Plan

Step	What Happens
1. Walkthroughs & Demo	Venlearn demonstrates the full system, answers administrator questions, confirms the school's priorities, and shows the workflows for leadership, bursary, teachers, parents and students.
2. Setup and Onboarding	The school structure, sessions, terms, classes, subjects, departments, fee items, roles, permissions, portals and selected templates are configured.
3. Data Migration	Venlearn helps import existing student, staff, guardian, class, fee and academic records from clean templates or supported exports from the school's current system.
4. Training and Support	Administrators, bursars, teachers, leadership and support staff receive role-based training, with support available for launch questions and ongoing usage.

Training Plan

- Leadership orientation: dashboard visibility, reports, approvals, term review, data protection and adoption expectations.
- Administrator training: student records, staff records, guardians, classes, admissions, promotions, timetable, messaging and general settings.
- Bursary training: fee schedules, invoices, receipts, balances, discounts, arrears, payment recording, reminders and finance reports.
- Teacher training: attendance, lesson planning, score entry, report remarks, assignments, resources, timetable, class communication and CBT participation.
- Parent-support training: helping parents access portals, understand receipts, results, attendance, assignments, notices and common account questions.
- Technical/admin handover: roles, permissions, backups or sync approach where applicable, escalation process and support contacts.

Data Protection, Access and Reliability

Venlearn should be configured around the principle that each person sees only what they need. Administrators can control access for staff, parents and students using role-based permissions. Sensitive medical, incident, finance and academic records should be restricted to approved users. For schools that require offline use, Venlearn can be deployed on a local area network so operations and CBT can continue without constant internet access, with sync options where needed.

- Use role-based access for administrators, bursars, teachers, parents, students and support staff.
- Maintain audit-friendly records for key workflows such as fees, report cards, attendance, communication and incidents.
- Confirm backup, sync and device policies during setup, especially for offline/local deployments.

Frequently Asked Administrator Questions

Ease of Use, Access and Core Workflows

Question	Answer
Will staff find it difficult to use?	The software is easy to use. However, Venlearn offers training and support programs to customers to help them easily navigate the platform.
Do we need all features at once?	The recommendation is to procure the Complete feature set so every major school workflow is covered. Day-to-day activation can still be scheduled carefully during onboarding so staff are trained properly.
What happens if our internet is unreliable?	Venlearn supports offline/local deployment for schools that need local area network access, especially for CBT and daily operations.
Can parents see only their own children?	Yes. Parent and guardian access is linked to their wards and controlled through secure role-aware portal views.
Can staff access only what they are assigned to access?	Yes. Venlearn uses role-based access controls so staff can be limited to assigned classes, subjects, departments, reports, approvals or operational responsibilities.
Can it generate report cards?	Yes. Venlearn supports scores, grading scales, remarks, approvals, class positions, report templates, downloadable reports and portal-ready publishing.

Frequently Asked Administrator Questions (Continued)

Migration, Pricing and Commitments

Question	Answer
Does it help collect fees?	Yes. It supports fee schedules, invoices, balances, receipts, arrears, discounts, payment plans, reminders and finance summaries.
Can it replace Google Forms for exams?	For many school exam scenarios, yes. Venlearn CBT supports offline LAN exams, online tests, question banks, timing, monitoring, marking and result publishing.
I have an existing software. How can I move my data?	Venlearn helps with data migration. Existing student, staff, guardian, class, finance and academic records can be prepared, cleaned and imported from supported exports or approved templates.
If I start with a smaller package, can I upgrade later?	Yes. A school can start with Essentials or Growth and upgrade later to add more modules, users, deployment options and support as needs grow.
Do you offer discount for long yearly commitment?	Yes. Venlearn offers discounts for yearly plans, with discounts as high as 25 percent depending on the package and commitment.
What if I am not satisfied?	You can cancel your subscription anytime and still be able to download your school data as Excel files.

Frequently Asked Administrator Questions (Continued)

Support, Branches and Custom Work

Question	Answer
Do you support schools with different branches?	Yes. Venlearn supports multi-branch or multi-campus schools, with centralized leadership visibility and branch-aware records, users, reports and operations.
Do you offer building or overhauling a school website?	Yes. Venlearn can support building a new school website or overhauling an existing one. Website work comes at a fixed one-time cost separate from the software subscription.
Can we request custom changes?	Yes. Custom reports, forms or workflow changes can be reviewed and quoted based on feasibility, timeline and product fit.
How long will onboarding take?	Onboarding can be completed in one week, provided the school shares the required records, confirms responsible staff, and attends the scheduled training sessions.
What support is available after launch?	Support should include troubleshooting, workflow guidance, refresher training, launch stabilization and periodic review with school administrators.

Success Measures for the First Term

- At least 90 percent of active student, staff and guardian records are complete and searchable.
- Attendance, fee balances and selected academic workflows are used consistently by assigned staff.
- Report cards are generated through Venlearn for the selected classes or school-wide rollout.
- Parents receive agreed notices, fee reminders, attendance updates or portal access without relying only on manual calls.
- Leadership receives usable reports for enrolment, attendance, fees, academics and selected operations.
- A post-launch review identifies remaining training needs, configuration changes and next modules to activate.

Next Steps for Approval

1. Approve a 60-minute demo for school leadership, administrators, bursars and selected teachers.
2. Approve the recommended Complete plan so all major Venlearn features are included in the school rollout.
3. Share current school size, number of campuses, internet conditions, desired modules, fee structure and existing record formats.
4. Agree the final quote, implementation timeline, data migration scope and training dates.
5. Nominate an internal project owner and module champions for administration, bursary, academics, ICT and parent support.
6. Begin setup, data collection and staff onboarding ahead of the target launch date.

Conversion close

Venlearn gives the school a complete path to modern administration: one operating system for records, fees, academics, communication, assessment, welfare, transport, hostel, inventory, activities, and campus life from the outset.
